

INTEGRATED OPERATIONS

Customer Objective

Simplify event-site operations by consolidating essential environmental, sanitation, transportation and waste services under a single accountable partner.

The Challenge

Large events often require multiple specialized vendors, equipment types, service schedules, drivers, disposal location and on-site contacts.

When each service is managed independently, event organizers can face:

- Fragmented communication
- Overlapping vendor responsibilities
- Inconsistent scheduling & documentation
- Limited visibility into activity
- Added administrative work for the customer
- Greater risk of service gaps
- Managing multiple vendor billing/payment

Sustain Solution

Sustain created a coordinated service program that included:

- Portable sanitation coordination
- Wastewater collection and hauling
- Temporary tanks and liquid storage systems
- Roll-off containers and liners
- Off-site transportation and disposal
- Tank and equipment cleaning
- Recycling support
- On-site project management
- Equipment coordination
- Daily service reporting
- Load and volume tracking

POINT OF
ACCOUNTABILITY

The greatest value is not another vendor. It is one partner coordinating all of them.
