

STORM RECOVERY SERVICES

Program Objective:

Provide rapid, scalable environmental and logistical support following a major natural disaster while helping utilities, retailers, municipalities and commercial facilities restore critical operations as quickly and safely as possible.

Challenge:

Large-scale disasters create immediate demands for manpower, waste management, infrastructure support, dewatering, logistics coordination and environmental services. Organizations must restore operations quickly while managing safety, regulatory requirements and damaged infrastructure.

Sustain Solution:

Sustain mobilized personnel, equipment, transportation resources and trusted partner resources to support disaster recovery efforts before, during and immediately following.

Services included:

- ✓ Utility support operations
- ✓ Debris and waste management
- ✓ Vacuum truck and pumping services
- ✓ Hazardous waste transportation & disposal
- ✓ Water extraction and structural drying
- ✓ Environmental remediation
- ✓ Personnel logistics and field support
- ✓ Emergency equipment deployment
