

# WASTE MANAGEMENT SERVICES

## Waste Transportation and Disposal

Our sustainable waste management solutions keep you cost-effective and compliant — from on-site waste generation to final disposal and reclamation. We choose the best solution in partnership with our clients focusing on cost containment and responsive service, while minimizing the impact on our planet. Our waste management solutions are available nationwide.

- Waste preparation, segregation, and containerization
- Waste characterization, analysis, and profiling
- Transportation; bulk and non-bulk shipments
- Hazardous, non-hazardous, wastewater and universal waste management
- Damaged and off specification reuse and recycling expertise
- Fuel blending, Incineration, Landfill, Reuse, and Recycling disposal and treatment options
- Nationwide less than truckload, dedicated truckload, and milk run services
- Transportation means; Roll-Off trucks, Vacuum Trucks, Tankers, Box trucks, Flatbeds, and Dump Trucks/Trailers
