

BUILT FOR URGENT SITUATIONS

Customer Objective

Provide rapid, scalable dumpster support during a humanitarian housing operation while ensuring uninterrupted service, maintaining site cleanliness and overcoming logistical challenges associated with a high-volume, continuously occupied facility.

The Challenge

In 2021, Fort Bliss established temporary housing facilities to accommodate refugees arriving from various locations around the globe. The operation required immediate and ongoing municipal waste management support at a scale far greater than traditional commercial operations.

The project demanded rapid mobilization, continuous coordination, strict site access compliance and solutions to overcome logistical challenges including landfill operating schedules, site security and fluctuating waste volumes.

Sustain Solution

At peak operations, Sustain coordinated the deployment of up to fourteen containers while supporting the evolving needs of the facility.

Key program element included:

- ✓ Rapid deployment
- ✓ Daily schedule removal
- ✓ Continuous communication
- ✓ Weight ticket verification
- ✓ Adapting to landfill schedule
- ✓ On-site problem solving
